

# HIGHLIGHT PRO

Create automatic clips of the best moments of your radio and TV signals. Maximize the impact of your content with clips ready to share with a single click.

**HighlightPro** is a module that uses AI to automatically create the best moments from your radio and TV recordings. Maximize the impact of your content with effortless, ready-to-share clips.

HighlightPro is an innovative solution that allows the automatic creation of highlights from recordings of radio and television channels. Using advanced artificial intelligence algorithms and content analysis, it automatically identifies and extracts the highlights of your broadcasts, facilitating their editing, distribution and monetization.

## Functionalities:

- 1 **Content Analysis:**
  - Speech recognition algorithms and audio patterns.
  - Detection of keywords, emotions and audience peaks.
- 2 **Automatic Clip Creation:**
  - Automatic generation of highlights based on predefined events (goals, interviews, interesting segments).
- 3 **Intuitive User Interface:**
  - Easy-to-use control panel to configure analysis parameters and highlights generation.
  - Optional preview and manual editing of automatically generated clips.
- 4 **Multi-platform distribution:**
  - Direct publishing to social networks, websites and mobile applications.
  - Export of clips in multiple video and audio formats.
- 5 **Multilingual Support:**
  - Ability to analyze and generate clips in multiple languages, extending the global reach of your content.

HighlightPro is the ideal tool for broadcasters who want to maximize the impact of their content, improving operational efficiency and increasing audience satisfaction. With HighlightPro, you turn every broadcast into a source of compelling, ready-to-share highlights.

### PRECISION

It uses AI algorithms to identify the most relevant and exciting moments with high accuracy.

### TIME SAVINGS

It significantly reduces the time needed to review and edit content, allowing your team to focus on more strategic tasks.

### COMPLETE AUTOMATION

Eliminates the need for tedious manual processes. HighlightPro analyzes and generates clips automatically.

### EASY INTEGRATION

Easily integrates with your existing content and broadcast management systems.

### MULTICHANNEL

It supports both radio and television recordings, providing a comprehensive solution for your broadcasting needs.

### SCALABILITY

Designed to grow with your needs, whether you manage a single channel or a multi-station network.
